- Always "allow" pop-ups from the current site by clicking on "Tools/Internet Options/Pop-up Blocker Setting" in the browser.

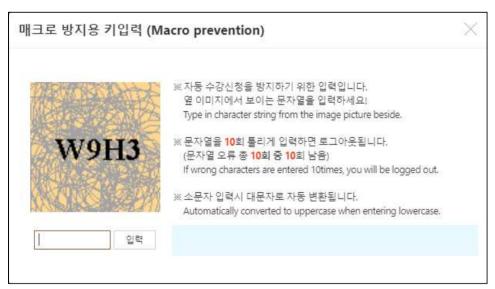

X Note

- Disable the pop-up blocker if the "Disable pop-up blocker" message appears as below, which happens when pop-up blocker is not properly disabled.

E. Macro Prevention

- To prevent system performance degradation arising from the use of macro programs, a set of characters is displayed on the screen after repeated attempts to save course registration are detected. Enter the characters and click the "Enter" button to continue.
- Lower-case letters entered are automatically converted into upper-case letters.
- The maximum number of unsuccessful save attempts and character input attempts may vary according to administrator settings.

F. Multiple Login Prevention

- If logged in from two or more devices (PC or mobile) using the same student number, only

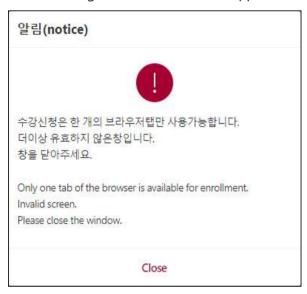

the user who last logged in can use the course registration system.

- Those other than the last logged-in user will be automatically logged out.

G. Multiple Tab Prevention

- Only one tab of the course registration browser is available for enrollment.
- The message window below will appear if multiple number of tables are in use.

H. Course Registration Delaying System

- To prevent course trafficking or course trading, if a course whose enrollment quota has been reached is deleted, registering for that course is allowed only after a certain period of time (30 minutes to 1 hour).
- Such delay is extended during late night and early morning hours.
- The message window below appears when a student attempts to register for a course whose registration is delayed.
- This system does not apply for the 30 minutes after the start and the final 60 minutes before the end of course registration period.
